

# 3-Bit Programmable 10K ECL Logic Delay Line

The 3-Bit Programmable 10K ECL Logic Delay Lines manufactured by Engineered Components Company are designed to provide output waveforms that reproduce the input waveform after a set amount of delay time has elapsed. The final delay of the output waveform can be adjusted during or after installation into a circuit. The adjustment is made by applying a logic "0" or "1" at each of the 3 multiplexor programming pins (see the Truth Table Examples). These delay lines are calibrated on the rising edge of the output. The Enable pin is active low, and when high, the output is forced low. The delay times are calibrated to the listed tolerances on the rising edge delays (see the Product Selection Table).

The MTBF on these modules, when calculated per MIL-HDBK-217, for a 50 deg.C ground fixed environment and with 50VDC applied, is in excess of 2 million hours. The temperature coefficient of delay is less than 150 ppm/deg.C over the operating temperature range of -30 to +85 deg. C.

The module is provided in a 16-pin DIP package, fully encapsulated in epoxy resin and is housed in a Diallyl Phthalate case, blue in color. The case marking is applied by silkscreen using white epoxy paint. The 9 copper leads are tin-lead plated and meet the solderability requirements of MIL-STD-202, Method 208.

Product Selection Table

| Part Number | *Step Zero Delay | Output Delays and Tolerances (in ns) |                         |  |
|-------------|------------------|--------------------------------------|-------------------------|--|
|             |                  | Step-to-Step Delay                   | Maximum Delay (Nominal) | ** Maximum Deviation From Programmed Delay |
| PECLDL-3-1  | 3.0+/-1.0        | 1.0+/-0.3                            | 10.0                    | +/-0.4                                     |
| PECLDL-3-2  | 3.0+/-1.0        | 2.0+/-0.4                            | 17.0                    | +/-0.6                                     |
| PECLDL-3-3  | 3.0+/-1.0        | 3.0+/-0.5                            | 24.0                    | +/-0.8                                     |
| PECLDL-3-4  | 3.0+/-1.0        | 4.0+/-0.5                            | 31.0                    | +/-0.9                                     |
| PECLDL-3-5  | 3.0+/-1.0        | 5.0+/-0.5                            | 38.0                    | +/-1.0                                     |
| PECLDL-3-6  | 3.0+/-1.0        | 6.0+/-0.6                            | 45.0                    | +/-1.2                                     |
| PECLDL-3-7  | 3.0+/-1.0        | 7.0+/-0.7                            | 52.0                    | +/-1.4                                     |
| PECLDL-3-8  | 3.0+/-1.0        | 8.0+/-0.8                            | 59.0                    | +/-1.6                                     |
| PECLDL-3-9  | 3.0+/-1.0        | 9.0+/-0.9                            | 64.0                    | +/-1.8                                     |
| PECLDL-3-10 | 3.0+/-1.0        | 10.0+/-1.0                           | 73.0                    | +/-2.0                                     |
| PECLDL-3-11 | 3.0+/-1.0        | 11.0+/-1.0                           | 80.0                    | +/-2.2                                     |
| PECLDL-3-12 | 3.0+/-1.0        | 12.0+/-1.0                           | 87.0                    | +/-2.4                                     |
| PECLDL-3-13 | 3.0+/-1.0        | 13.0+/-1.0                           | 94.0                    | +/-2.6                                     |
| PECLDL-3-14 | 3.0+/-1.0        | 14.0+/-1.0                           | 101                     | +/-2.8                                     |
| PECLDL-3-15 | 3.0+/-1.0        | 15.0+/-1.0                           | 108                     | +/-3.0                                     |
| PECLDL-3-20 | 3.0+/-1.0        | 20.0+/-1.5                           | 143                     | +/-4.0                                     |
| PECLDL-3-25 | 3.0+/-1.0        | 25.0+/-1.5                           | 178                     | +/-5.0                                     |
| PECLDL-3-30 | 3.0+/-1.0        | 30.0+/-2.0                           | 213                     | +/-6.0                                     |
| PECLDL-3-35 | 3.0+/-1.0        | 35.0+/-2.0                           | 248                     | +/-7.0                                     |
| PECLDL-3-40 | 3.0+/-1.0        | 40.0+/-2.5                           | 283                     | +/-8.0                                     |
| PECLDL-3-45 | 3.0+/-1.0        | 45.0+/-2.5                           | 318                     | +/-9.0                                     |
| PECLDL-3-50 | 3.0+/-1.0        | 50.0+/-2.5                           | 353                     | +/-10.0                                    |

\* Delay at step zero is referenced to the input pin.

\*\*All delay times after step zero are referenced to step zero.

## TRUTH TABLE EXAMPLES (Delay times in ns)

| Part Number | Programming Pin 3 | Programming Pin 2 | Programming Pin 1 | Delay Times (ns) |    |    |    |    |   |   |
|-------------|-------------------|-------------------|-------------------|------------------|----|----|----|----|---|---|
|             |                   |                   |                   | 0                | 0  | 0  | 1  | 1  | 1 | 1 |
| PECLDL-3-1  | 3                 | 1                 | 2                 | 3                | 4  | 5  | 6  | 7  |   |   |
| PECLDL-3-5  | 3                 | 5                 | 10                | 15               | 20 | 25 | 30 | 35 |   |   |

Special modules can often be manufactured to provide for customer specific applications.

## BLOCK DIAGRAM

## Operating Specifications:

All measurements made at 25 deg. C  
 All measurements made with V<sub>ee</sub> = -5.2VDC, V<sub>cc</sub> = 0VDC  
 All measurements made with (1) 10K ECL output load  
 All measurements made with a 100 ohm pulldown resistor to -2VDC at the input and output

Operating Temperature: -30 to +85 deg. C  
 Storage Temperature: -55 to +125 deg. C

V<sub>ee</sub> Supply Voltage: -5.2 +/-5% VDC  
 V<sub>ee</sub> Supply Current: 50mA typical  
 Logic "High" Input:  
 Voltage: -0.98VDC min.  
 Current: PECLDL-3-1 through PECLDL-3-8 = 750uA typ.  
 PECLDL-3-9 through PECLDL-3-50 = 16mA typ.

Logic "Low" Input:  
 Voltage: -1.63VDC max.  
 Current: PECLDL-3-1 through PECLDL-3-8 = -750uA typ.  
 PECLDL-3-9 through PECLDL-3-50 = -6mA typ.

Logic "High" Voltage Out: -0.96VDC min.  
 Logic "Low" Voltage Out: -1.65VDC max.  
 Multiplexor setup time = 2ns typ.
